

IP Address Tracker:

IP Address Tracker is a simple android application that is used to find the location of a device by knowing its IP Address.

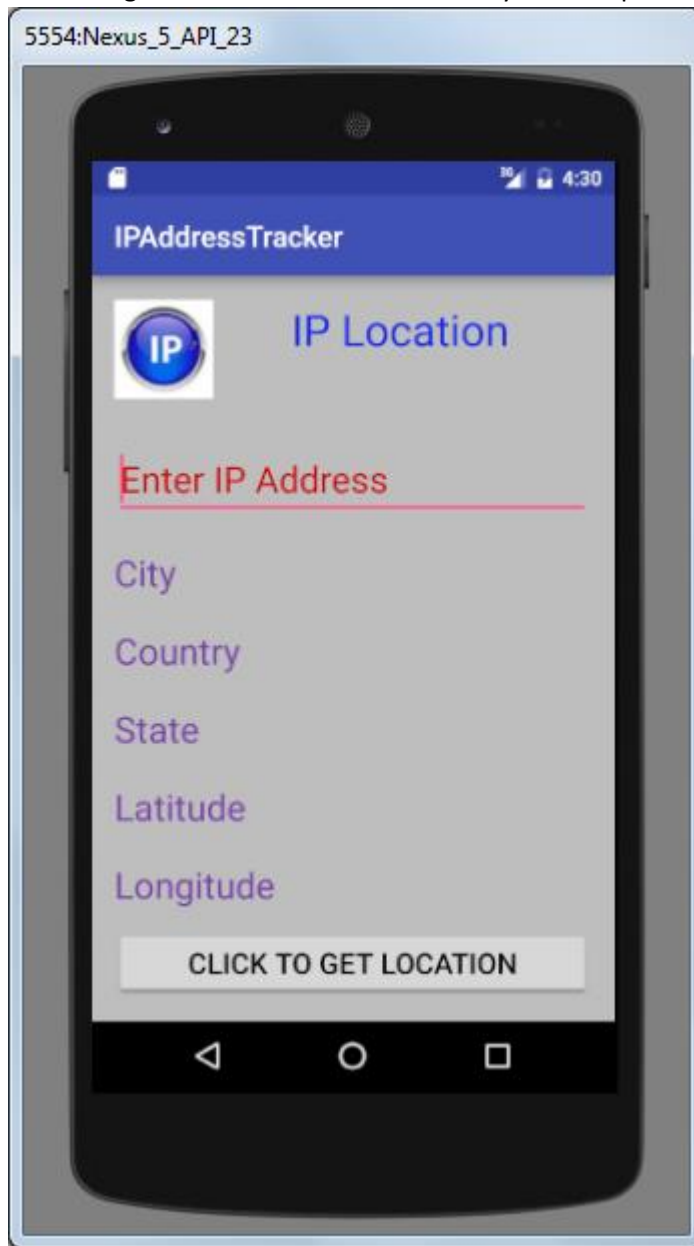

Steps to run the applications:

1. On running the app a home page opens as shown below.

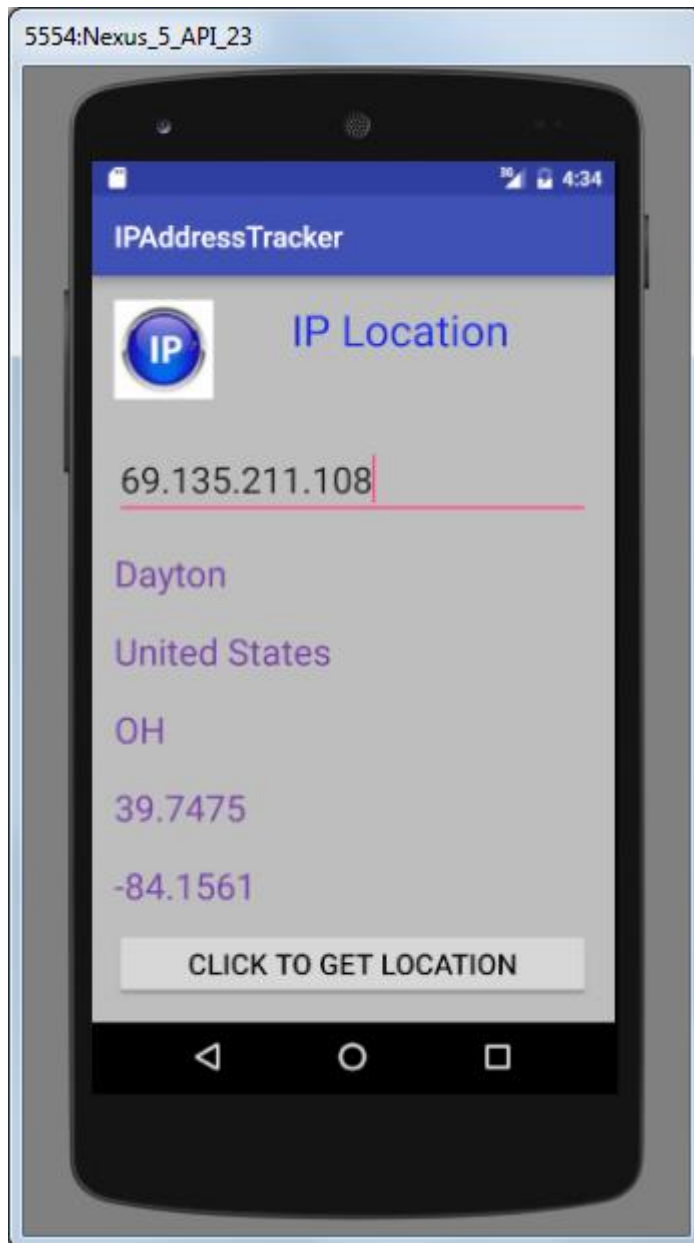

Click on the “IP LOCATION” button and it will be directed to another activity.

2. On clicking IP LOCATION button an activity will be opened as shown below.

Here we will get an option to enter the Ip Address of whose location we need to find. Once you enter IP Address and click on "CLICK TO GET LOCATION" button all the fields will get updated with corresponding values of Ip Address coordinates.

Result:

We can enhance this application by taking the latitude and longitude to direct to google maps location. Also we can give another option to retrieve user device IP Address.
